sprinta
SERIES

take your
mind
for a run.

The AMBRA Sprinta is our slimline desktop model. It's compact but has plenty of room for growth.

Like other AMBRA models, the Sprinta comes complete with keyboard, mouse and a choice of high quality VGA or SVGA monitor.

It's ready to run with DOS and Windows, allowing you to set up and start working with your software straight away. Detailed, user friendly manuals will guide you every step of the way to getting the most from your Sprinta PC.

The Sprinta is available in a 40 megabyte or 80 megabyte version, depending on how much space you need to store your data and to run your programs efficiently.

FEATURE	BENEFIT
Unique AMBRA styling.	Enhances your working environment and provides maximum comfort and convenience.
Low profile, slimline appearance.	Looks good; still very expandable.
Preconfigured with DOS and Windows.	Excellent value; allows you to get started straight away; gives you a choice of operating environments – to run most PC software.
25Mhz 386SX Processor.	Faster performance; compatible with a wide range of software, both old and new.
Fast IDE Controller.	Allows multiple drives and higher system performance.
Paged-mode Interleave memory.	Allows extra fast access to the system memory.
Choice of 16-bit VGA/SVGA display.	High quality graphics and text; your choice of resolution.
3 Expansion slots.	Allows you to add network, modem and game cards etc.
Security keylock and password.	Protects your programs and data from unauthorised access.
Free telephone support and 12 months' free on-site service.	Peace of mind, convenience, assurance.
