

AP370VF/F Socket 370 Celeron SBC with AGP-2X VGA, SSD & Digital I/O

Industrial PICMG SBC

The AP370VF/F is a full-size PICMG Single Board Computer (SBC) that builds on the **Intel 440BX AGPset** and accepts **Intel Celeron Socket 370 PPGA** processors up to 500MHz and higher. This gives you near Pentium II level performance with less heat build up and a lower cost.

The AP370VF has on-board S3 Trio LC2X 86C362 **AGP-2X** chip with 4MB video memory to provide resolutions up to 1600 x 1200 with 256 colors (up to 16.7M colors at lower resolutions). One special feature of the AP370VF/F is **two DiskOnChip sockets** that can support up to 288MB of SSD. The AP370VF/F also has a 4-bit **Digital Input/Output** header. A watchdog timer provides a hardware IRQ at 7 different interval settings as well as a software IRQ with 16 different interval settings.

These models have many features to offer for a reasonable cost. Other on-board features include two PCI Enhanced IDE ports for up to four IDE or Ultra DMA-33 devices, two serial ports (one selectable RS-232/422/485), one multi-mode parallel port, two USB ports, one IrDA interface, and system health monitoring.
