

### The real one The PS/1 Consultant Model 2155-G44

This compact IBM PC is easy-to-use yet powerful enough to run most of today's most popular software. The PS/1<sup>®</sup> Consultant gives you the kind of power and performance that can only be equated with the IBM name. The PS/1 Consultant is not an "IBM compatible"—it's a real IBM PC. Since more than half of the PS/1's manufacturing time is spent on testing, you can be sure that the PS/1 is built to IBM's exacting standards for quality and reliability.

### High power processing and growth

The PS/1 Consultant 2155-G44 is built with the fast working Intel486<sup>™</sup> SX processor. And if your business quickly goes into overdrive, you can easily upgrade to a 486<sup>™</sup> DX processor—40 MHz operation with OverDrive.<sup>™</sup> Plus, it's easy to expand your PS/1 Consultant 2155-G44 with industry standard memory and options.

### Exclusive IBM preloaded software

Only the PS/1 comes with a ready supply of exclusive software to make work easier: PS/1 Tutorial helps you get started using Windows;<sup>™</sup> PS/1 Index gives you step-by-step instructions to help you become familiar with all the features of your PS/1; and PS/1 Fitness keeps your systems in top shape. There's even a built-in virus check.

### Immediate support and service

Have a question? The online PS/1 Club<sup>™</sup> answers your computing questions, 20 hours a day, 365 days a year. And of course, the PS/1 Consultant comes backed with IBM's world-class service and support, including IBM's renowned Express Maintenance service. What's more, each PS/1 Consultant has a one-year limited warranty.

#### Feature

#### Benefit
